Contents of Vol. 39

Vol. 39, No. 1

Shear wave propagation after stepwise increase of shear rate
J.S. Lee and G.G. Fuller (Stanford, CA, U.S.A.) 1

Flows of viscoelastic fluids treated by the method of characteristics
F.G. Basombrío (Rio Negro, Argentina) 17

Flow of a non-Newtonian liquid through a channel when solidification of a liquid leads to wall slip
A.Ya. Malkin and A.V. Baranov (Moscow, U.S.S.R.) 55

Numerical simulation of thermal convection with Maxwellian viscoelasticity
H. Harder (Mainz, Germany) 67

A numerical study of the planar contraction flow of a viscoelastic fluid using the SIMPLER algorithm
J. Yul Yoo and Y. Na (Seoul, Korea) 89

An exact non-stationary solution of simple shear flow in a Bingham fluid
K. Sekimoto (Nagoya, Japan) 107

Announcements 115

Calendar 117

Vol. 39, No. 2

Determination of polymer melt viscosity by squeezing flow with constant plate velocity
G. Winther, K. Almdal and O. Kramer (Copenhagen, Denmark) 119

Spin coating of non-Newtonian fluids
C.J. Lawrence and W. Zhou (Urbana, IL, U.S.A.) 137

Simulation of highly elastic fluid flows without additional numerical diffusivity
F.G. Basombrío, G.C. Buscaglia and E.A. Dari (S.C. de Bariloche, Argentina) 189

Short Communication

One modification of the Ericksen–Leslie equations in a two-dimensional motion
G. Ryskin (Evanston, IL, U.S.A.) 207

Book reviews 211

Calendar 215

Vol. 39, No. 3

Secondary flows in straight ducts of rectangular cross section
B. Gervang and P.S. Larsen (Lyngby, Denmark) 217

Flow regimes for fiber suspensions in narrow gaps
C.L. Tucker III (Urbana, IL, U.S.A.) 239

Numerical integration of differential viscoelastic models
J. Rosenberg (Berkeley, CA, U.S.A.) and R. Keunings (Louvain-la-Neuve, Belgium) 269

Vane rheometry of bentonite gels
N.J. Alderman, G.H. Meeten and J.D. Sherwood (Cambridge, U.K.) 291

Squeeze-film rheometry of non-uniform mudcakes
J.D. Sherwood, G.H. Meeten, C.A. Farrow and N.J. Alderman (Cambridge, U.K.) 311

Yield stress fluid. Structural model and transient shear flow behaviour
P. Doremus and J.M. Piau (Grenoble, France) 335

Turbulent hydrodynamic behaviour of a drag-reducing viscoelastic fluid in a sudden-expansion pipe
B. Pak, Y.I. Cho and S.U.S. Choi (Philadelphia, PA, U.S.A.) 353

Viscoelastic flow in an undulating tube. Part II. Effects of high elasticity, large amplitude of undulation and inertia
S. Pilitsis and A.N. Beris (Newark, DE, U.S.A.) 375
